

Birds in Flight

Educational

Meeting

March 23, 2023

Chris

Jan

Jan's Camera Settings for Birds in Flight

- 1/2000 second shutter speed
- Sometimes 1/2500 - 1/3000 for birds that have rapid wing beats like Hummingbirds for ducks lifting off the water
- F.7
- Auto ISO
- Note: This is the setting I use 95% of the time during an outing. And I LOCK these settings so they don't accidentally get changed when walking around. This happens more than you think!

Rick

Mike

Walt

Robyn

**Thanks, Chris, Jan,
Rick, Mike, Walter
and Robyn for
sharing with us.**
